

Steel Supporting Board for Scaffolding with metal board Customized Thickness

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT02

Product Specification

- Edge: Smooth
- Width: Customized
- Material: Steel
- Thickness: Customized
- Usage: Scaffolding
- Design: Standard
- Structure: Solid
- Surface: Pre-galvanized/hot Dip Galvanized
- Highlight: **Steel Scaffolding Plank,
Customized Scaffolding Plank**

Product Description

Product Description:

Scaffolding Plank is a professional supporting board for scaffolding which is made of high-quality steel and has a solid structure. It has a smooth edge which ensures the safety of personnel and objects. It is customized to fit different lengths and weights, making it more convenient to use in various construction projects. With its high strength and durability, it is an ideal product to provide stable support for scaffolding.

The steel plank is designed to meet the needs of different construction projects. It can be used in both indoor and outdoor environments and is perfect for supporting scaffolding. It is easy to install and can be reused multiple times. With its exceptional strength and durability, it can support large weights and withstand long-term use.

The steel plank is the perfect choice for any scaffolding project. It is designed to provide maximum safety and stability. With its smooth edges and customized lengths and weights, it can handle any scaffolding project with ease. It is designed to be lightweight and easy to transport, making it an essential product for any construction project.

Features:

Product Name: Scaffolding Plank

Packaging: Container

Material: Steel

Design: Standard

Thickness: Customized

Surface: Pre-galvanized/hot Dip Galvanized

Technical Parameters:

Product Attributes	Details
Material	Steel
Length	Customized
Thickness	Customized
Surface	Pre-galvanized/hot Dip Galvanized
Usage	Scaffolding
Width	Customized
Structure	Solid
Design	Standard
Weight	Customized
Edge	Smooth

Applications:

Bythai BT02 Steel Plank - Scaffolding Plank

Bythai BT02 Steel Plank is a Scaffolding Plank ideal for various construction projects. This steel plank is made of high-quality material with reliable performance, easy installation and long-term usage life. It has a customized weight for different construction applications and a smooth edge for an enhanced durability. The plank is available in steel color with pre-galvanized or hot dip galvanized surface.

Bythai BT02 Steel Plank is ideal for scaffolding works, building projects, and elevated platforms. Its reliable performance and easy installation make it suitable for both commercial and residential applications. The steel plank is designed to be durable and safe and to meet all safety standards. It is also corrosion-resistant and low-maintenance.

Bythai BT02 Steel Plank is the perfect choice for scaffolding projects. With its reliable performance and easy installation, this steel plank is the perfect choice for any construction project.

Customization:

Scaffolding Plank

Brand Name: Bythai

Model Number: BT02

Place of Origin: China

Material: Steel
Width: Customized
Structure: Solid
Surface: Pre-galvanized/hot Dip Galvanized
Edge: Smooth
