Product Description

Support Function Adjustable Steel Prop Telescopic Scaffolding Props With Heavy Duty

Product Description:

Adjustable Steel Prop is a construction site prop designed to provide strong, reliable support for building pillars. It is made of steel and its surface is treated with hot dip galvanizing for rust-proof protection and long-term durability. The size of the steel prop is standard, making it suitable for most construction sites. It is easy to adjust to any height and can be quickly mounted and dismantled. This product is lightweight and easy to transport, and it is packed in containers for secure delivery. The adjustable steel prop is perfect for a variety of construction sites, providing a safe and secure support for building pillars, bridges, and other structures.
