Monkey Ladder	300	2000	5.7
	300	3000	7.9
	300	4000	10.3
	300	6000	22.1

Applications:

Scaffolding Ladders - bythai BM224

The bythai BM224 scaffolding ladders are designed for easy and secure access to high places. This ladder without hook is made of galvanized steel and has a surface treatment of HDG, making it highly durable and resistant to corrosion. It has a minimum order quantity of 1000 units and is delivered in a container. The step height is 30cm and the step width is 50cm, while the overall size is 3m.

The bythai BM224 scaffolding ladders are ideal for use as scaffolding props. Highly resistant to corrosion, they are perfect for use in any environment or weather conditions. The HDG surface treatment ensures a long-lasting finish, allowing you to use them safely and securely for many years.

The bythai BM224 scaffolding ladders are perfect for any construction or industrial site. They are easy to install and can be used for any type of work, from painting to plumbing. With their strong and secure design, you can rest assured that your workers are safe and secure on any job.

If you're looking for a reliable ladder without hook, the bythai BM224 scaffolding ladders are the perfect solution. With their robust and corrosion-resistant design, they will provide you with a safe and secure way to access any high place.

Packing and Shipping:

Packaging and Shipping of Scaffolding Ladders

Scaffolding ladders should be packed in crates or boxes and then wrapped in plastic before shipping. The total weight of the packages should be under the weight limit set by the shipping company. Additionally, the packages should be labeled with the product name, size, weight, and other relevant information.

When shipping, all packages should be stacked in such a way that they do not shift during transit. The shipping company should be informed of the total weight of the shipment and the dimensions of the packages. The company should also be informed of any hazardous materials that may be present in the shipment.
