

Galvanized Scaffolding Steel Plank With Hooks Steel Scaffold Planks

Our Product Introduction

Basic Information

- Place of Origin: china
- Brand Name: bythai
- Certification: SGS
- Model Number: BM202
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: L/C

Product Specification

- Color: Silver
- End Hooks: Yes
- Place Of Shipment: China
- Product Type: Steel Planks
- Size: Standard
- Structure: Solid
- Surface Treatment: Hot-dipped Galvanized
- Usage: Construction And Maintenance Work
- Weight: Customized
- Highlight: **Galvanized Scaffolding Steel Plank,
Hooks Steel Scaffold Planks,
Hot Galvanized Scaffolding Steel Plank**

Product Description

galvanized scaffolding steel plank with hooks stee scaffold planks for sale

Material: Scaffolding steel plates are usually made of high-quality low-alloy high-strength steel to ensure its strength, durability and stability.

Specifications and sizes: According to different engineering needs, scaffolding steel plates are available in a variety of specifications and sizes. Common specifications include parameters such as length, width and thickness to accommodate different building structures and support requirements.

Surface treatment: In order to improve corrosion resistance and extend service life, scaffolding steel plates are usually hot-dip galvanized to form a uniform zinc protective layer to effectively prevent oxidation and corrosion.

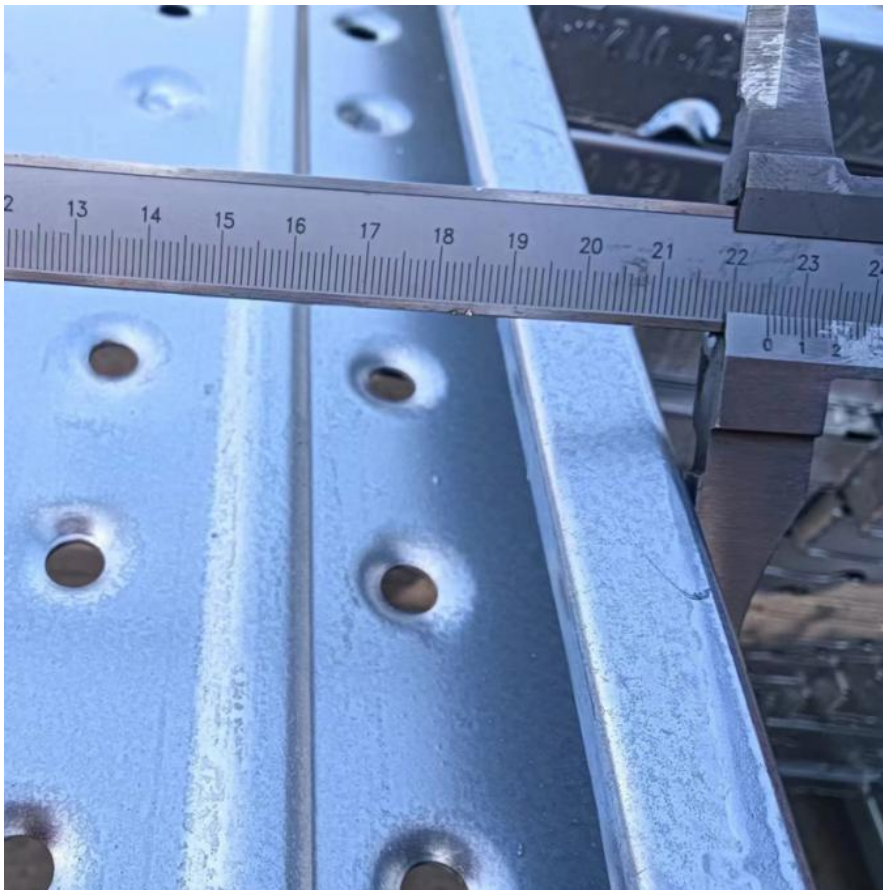

Design Features: Scaffolding steel plates are usually designed for ease of installation and removal, as well as compatibility with other scaffolding components. Some designs may also include non-slip surfaces to increase worker safety when working at heights.

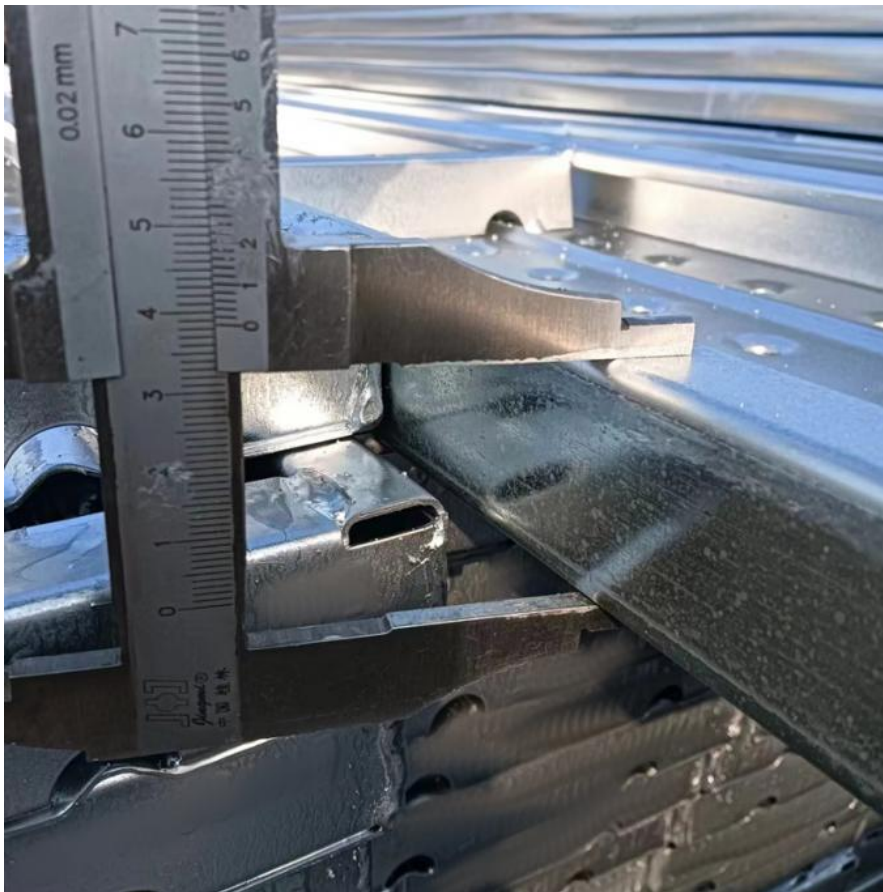

Comply with standards: The production of scaffolding steel plates usually complies with national or regional construction standards and safety regulations to ensure their quality and safety in use.

Bearing capacity: According to design requirements, scaffolding steel plates need to have sufficient bearing capacity to support the weight of workers, tools and materials, and to ensure the stability and safety of the working platform.

Application fields: Scaffolding steel plates are widely used in construction, bridge engineering, power facility maintenance and other fields to provide workers with a safe and reliable working platform.

Steel plank
