Product Description

Product Description:

Scaffolding Plank

Our Scaffolding Plank is a high-quality, durable and safe galvanized steel plank designed for use in scaffolding systems. Made from top-grade steel material, our planks provide a strong and sturdy platform for workers to perform their tasks at elevated heights. With customizable lengths and secure packaging, our product is the perfect solution for all your scaffolding needs.

Material: Steel

Our scaffolding plank is made from high-quality steel material, ensuring strength and durability. The steel planks are galvanized to prevent corrosion and increase the lifespan of the product. This makes it a reliable choice for all types of scaffolding projects.

Length: Customized

We understand that every scaffolding project is unique and requires specific lengths of planks. That's why we offer customized lengths for our steel planks to meet your specific requirements. From shorter lengths for smaller projects to longer lengths for larger projects, we have you covered.

Packaging: Container

To ensure the safety and protection of our scaffolding planks during transportation, we package them in secure containers. This protects the planks from any damage or weather conditions during shipment, ensuring that they arrive in perfect condition at your desired location.

Usage: Scaffolding

Our scaffolding plank is specifically designed for use in scaffolding systems. It provides a stable and secure platform for workers to perform their tasks at elevated heights. Whether it's for construction, maintenance, or any other project, our steel planks are the ideal choice for scaffolding.

Place of Shipment: China

Our scaffolding planks are manufactured in China, ensuring high-quality standards and competitive prices. With our efficient shipment process, we can deliver our products to any location around the world, making it a convenient and reliable choice for all your scaffolding needs.

Delivery Time: 10-15

Payment Terms: container, shipping

Place of shipment: China

Material: Steel

Length: Customized

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Usage: Scaffolding

Scaffolding Plank - the perfect solution for construction sites and industrial projects.

Product Description:

Our Scaffolding Plank, also known as steel plank, is made of high-quality steel and has a thickness of 2.30mm. It is the ideal choice for scaffolding and provides a sturdy and safe platform for workers to stand on during construction.

The plank is designed with a hook on each end, allowing for easy installation and removal. The hooks also provide a secure connection between planks, ensuring stability and safety for workers. The endcaps on both ends of the plank prevent it from slipping off the scaffolding, providing an extra layer of protection.

The length of the plank can be customized according to your specific needs, making it suitable for various scaffolding structures. It also has a pre-galvanized, hot dip galvanized, or spray plastic surface, providing excellent protection against rust and corrosion.

Application:

Our Scaffolding Plank is widely used in construction sites, industrial projects, and other temporary structures. It is perfect for use in the construction of buildings, bridges, and other tall structures.

It provides a safe and stable platform for workers to work on at different heights, making it an essential tool for any construction project. It can also be used for maintenance and repair work, such as painting, cleaning, and installation of equipment.

Advantages:

1. High-quality material: Made of high-quality steel, our scaffolding plank is strong, durable, and can withstand heavy loads.
2. Easy to install: The hooks on both ends of the plank make it easy to install and remove, saving time and effort.
3. Customizable length: The length of the plank can be customized to fit your specific scaffolding needs.
4. Anti-rust and corrosion: The pre-galvanized, hot dip galvanized, or spray plastic surface provides excellent protection against rust and corrosion, ensuring the longevity of the plank.
5. Safe and secure: The hooks and endcaps on the plank provide a secure connection between planks and prevent slipping, ensuring the safety of workers.

Ordering Information:

Our galvanized steel planks with hooks are the perfect choice for strong and durable scaffolding solutions. Contact us now for a personalized quote and let us help make your construction project a success.

Packing and Shipping:

Packaging and Shipping of Scaffolding Plank

Our Scaffolding Planks are carefully packaged and shipped to ensure safe delivery to our customers.

Packaging:

Each plank is individually wrapped in plastic to protect against moisture and other environmental factors.

Multiple planks are stacked and secured with straps to prevent movement during transit.

The entire package is then wrapped in a protective layer of bubble wrap or foam to further protect against any potential damage.

Finally, the packaged planks are placed in a sturdy cardboard box for added protection during shipping.

Shipping:

We offer various shipping options to accommodate the needs of our customers:

Standard shipping: Planks are shipped via ground transportation and typically arrive within 3-5 business days.

Expedited shipping: For urgent orders, we offer expedited shipping options for faster delivery.

International shipping: We ship our planks internationally to customers around the world.

Our team carefully tracks all shipments to ensure timely and accurate delivery. In the rare case of any shipping issues, we will work quickly to resolve them and ensure our customers receive their planks as soon as possible.
