

High Load Capacity Frame System Scaffolding For Q235 Material Performance

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Arrival Time: 10-15
- Load Capacity: High
- Shipping Origin: China
- Color: Steel/Spray Plastic
- Material: Q235
- Size: Customized
- Highlight: **Q235 Material Frame Scaffolding System, Portal Frame System Scaffolding, Q235 Steel Main Frame Scaffolding**

High Load Capacity Frame System Structuring For Q235 Material Performance

Product Description:

Frame System Scaffolding

Customized Size | 10-15 Arrival Time | Steel/Spray Plastic Color | High Load Capacity | Made in China

Frame System Scaffolding is a versatile and essential tool for construction projects. It is a type of scaffolding that is designed to provide a safe and stable platform for workers to perform their tasks at different heights. This scaffolding system is made up of h frame and scaffold portal frames, providing a strong and sturdy support for workers.

The Portal Frame System is a key component of this scaffolding. It is a modular system that can be easily assembled and disassembled, making it convenient for transportation and storage. The frame components are made of high-quality steel, ensuring durability and strength. The frames are available in various sizes to meet the specific needs of different construction projects. The size of the scaffolding can also be customized according to the requirements of the customer.

This scaffolding system is designed to be easy to set up and use, with no special tools or equipment required. It has a quick and secure locking mechanism, ensuring the safety of workers while they are working at heights. The frames are also designed with adjustable heights, making it suitable for different types of construction projects.

The Scaffold Portal Frame System is a key feature of this scaffolding. It is a type of frame shoring system that provides additional strength and stability to the scaffolding. The portal frames are made of high-quality steel and are designed to withstand heavy loads. This allows for a high load capacity, making it suitable for heavy-duty construction projects.

Technical Parameters:

Product Name	Frame System Scaffolding
Color	Steel/Spray Plastic
Size	Customized
Arrival Time	10-15
Material	Q235
Shipping Origin	China
Load Capacity	High
Key Features	American Frame, H Frame, Portal Frame Scaffolding

Applications:

Bythai Frame System Scaffolding – Enhance Your Construction Safety and Efficiency

Brand Name: Bythai
Model Number: BM205
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15
Payment Terms: TT/TC
Arrival time: 10-15
Load Capacity: High
Color: Steel/Spray Plastic
Material: Q235
Shipping origin: China

Bythai Frame System Scaffolding is a versatile and durable construction product that is designed to provide safety, convenience, and efficiency for building projects. It is the perfect solution for both residential and commercial construction, as well as industrial and renovation projects.

Application and Usage

Bythai Frame System Scaffolding is widely used in various construction projects, such as building construction, bridge construction, and renovation projects. It is also ideal for use in industrial settings such as factories, warehouses, and power plants. The frame system scaffolding is suitable for both indoor and outdoor use, making it a versatile choice for various applications.

Features and Benefits

With its high load capacity, Bythai Frame System Scaffolding is designed to support heavy loads, making it ideal for use in construction projects of all sizes. The steel/spray plastic color option provides a professional and sleek appearance, while the Q235 material ensures

the product's durability and long lifespan.

One of the key advantages of Bythai Frame System Scaffolding is its ease of assembly and disassembly. The frame uprights, horizontal braces, and diagonal braces can be easily connected and secured, allowing for quick and efficient setup. This not only saves time but also reduces labor costs, making it a cost-effective solution for construction projects.

Another notable feature of Bythai Frame System Scaffolding is its stability. The frames are designed to be lightweight, yet sturdy and secure. This allows for easy transportation and movement of the scaffolding, without compromising on safety and stability. The adjustable height also adds to the convenience and versatility of the product.

Why Choose Bythai?

Bythai is a trusted brand in the construction industry, known for its high-quality and reliable products. Our Frame System Scaffolding is SGS certified, ensuring that it meets the highest quality and safety standards. We also provide excellent customer service and technical support, ensuring that our customers have a smooth and hassle-free experience with our products.

So whether you are a contractor, builder, or homeowner, Bythai Frame System Scaffolding is the perfect solution for your construction needs. With its safety, efficiency, versatility, and durability, you can trust Bythai to enhance your construction projects and help you achieve your goals.
