Product Description:

Scaffolding Plank Overview

Scaffolding plank is an essential component in the construction industry, providing a sturdy and safe platform for workers to perform their tasks at elevated heights. Made from high-quality steel, this product is designed to withstand heavy loads and harsh environments, making it a reliable choice for construction projects of all sizes.

Surface Options

The scaffolding plank is available in three surface options: pre-galvanized, hot dip galvanized, and spray plastic. The pre-galvanized surface is coated with a layer of zinc to prevent corrosion, while the hot dip galvanized surface is dipped in molten zinc for maximum protection. The spray plastic surface is coated with a layer of high-quality plastic for added durability and resistance to wear and tear.

Material

The scaffolding plank is made from high-quality steel, ensuring strength and durability. This material is known for its excellent load-bearing capacity and ability to withstand extreme weather conditions, making it ideal for use in scaffolding systems.

Packaging

The scaffolding plank is packaged in containers for easy transportation and storage. This ensures that the planks are well-protected during shipping and can be easily moved around the construction site.

Usage

The primary usage of the scaffolding plank is, of course, in scaffolding systems. It provides a stable and secure platform for workers to perform their tasks at varying heights. Whether it's for construction, maintenance, or repair work, the scaffolding plank is an essential tool for ensuring the safety and efficiency of any project.

Length Customization

The scaffolding plank is available in various lengths to suit different construction needs. Whether you need shorter planks for small-scale projects or longer planks for larger structures, we can customize the length to meet your specific requirements.

Key Features

BS1139 steel plank

Scaffolding steel walking planks hook

Customizable length

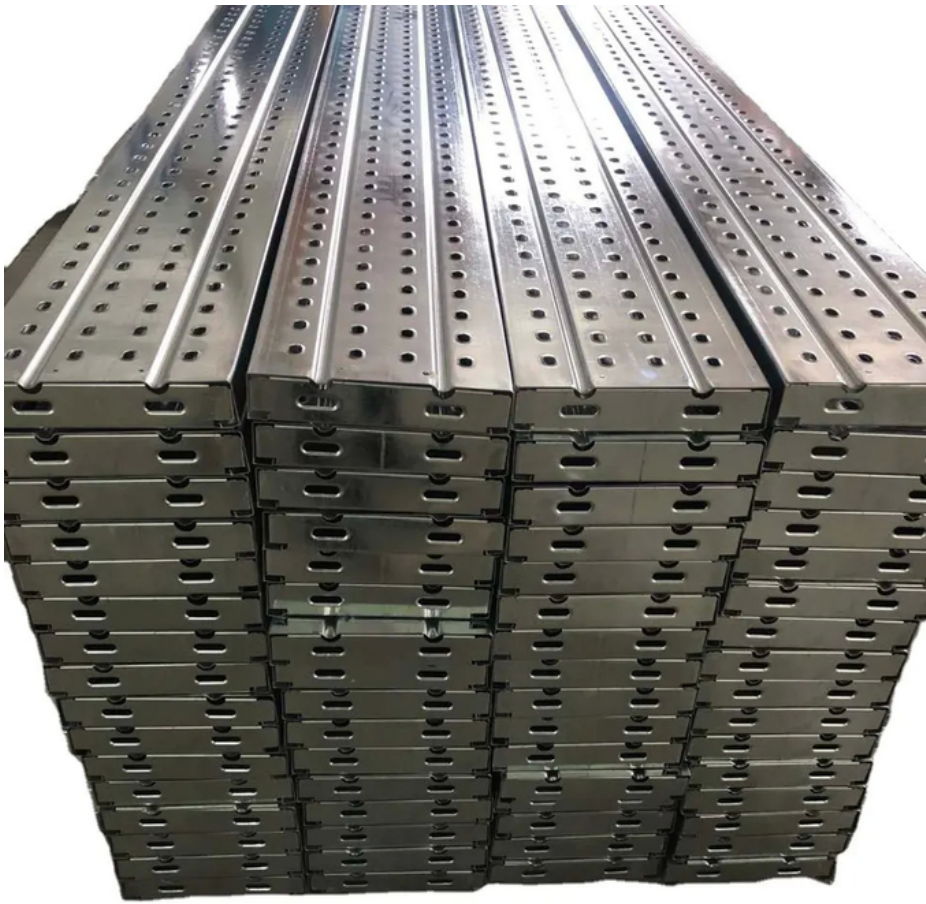

Durable and strong steel material

Multiple surface options for added protection

Convenient packaging in containers

In conclusion, the scaffolding plank is an essential and versatile product for any construction project. With its sturdy steel material, customizable length, and various surface options, it provides a safe and reliable platform for workers to perform their tasks with ease.

Features:

- Product Name: Scaffolding Plank
- Length: Customized
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Usage: Scaffolding
- Packaging: Container
- Place of shipment: China
- Steel frame for decking plank
- Scaffolding steel walking planks hook
- Galvanized steel scaffolding plank
- Steel scaffolding plank
- Hot dip galvanized scaffolding plank

Technical Parameters:

Attribute	Value
Product Name	Scaffolding Plank
Place of Shipment	China
Surface	Pre-galvanized/hot Dip Galvanized/Spray Plastic
Material	Steel
Length	Customized
Packaging	Container
Usage	Scaffolding
Key Features	
Steel Plank Type	With Hooks
Steel Catwalk Scaffold	Yes
Scaffolding Steel Plank	Yes
Steel Plank Width	230mm

Applications:

Scaffolding Plank - Bythai BM205

If you are in need of strong and durable scaffolding planks, look no further than Bythai BM205. Our galvanized steel planks are among the best in the market, providing a safe and reliable solution for any construction project.

Brand Name: Bythai

Model Number: BM205

Place of Origin: China

Minimum Order Quantity: 1000

Price Range: \$4.5 - \$8.5

Packaging Details: In Bundles

Delivery Time: 10-15 days

Payment Terms: Container, Shipping

Length: Customized

Packaging: Container

Surface: Pre-galvanized/Hot Dip Galvanized/Spray Plastic

Place of Shipment: China

Usage: Scaffolding

Our scaffolding planks are made from high-quality galvanized steel, ensuring strength and durability even in the toughest construction environments. They are designed to withstand heavy loads and provide a stable platform for workers to perform their tasks safely.

The galvanized steel plank catwalk design features a non-slip surface, providing a secure grip for workers and preventing accidents. The galvanized steel plank walkboard is also easy to install, saving time and effort during the construction process.

Our scaffold planks are suitable for a variety of applications, such as building construction, bridge construction, and even shipbuilding.

They can also be used for maintenance and repair work, providing a stable and secure platform for workers to access hard-to-reach areas.

With a minimum order quantity of 1000, our scaffolding planks are perfect for large construction projects. And with a range of prices from \$4.5 to \$8.5, we offer competitive pricing without compromising on quality.

Our scaffolding planks are packaged in bundles for easy transportation and storage. They can be delivered in containers, making it convenient for international shipping. Our delivery time is 10-15 days, ensuring timely arrival of the product to your construction site.

Choose from pre-galvanized, hot dip galvanized, or spray plastic surface options to suit your specific needs. We also offer customized lengths to meet your project requirements.

No matter the size or complexity of your construction project, Bythai BM205 scaffolding planks are the perfect solution for all your scaffolding needs. Place your order now and experience the quality and reliability of our products.

Customization:

Scaffolding Plank Customization Service - Bythai
