

contruction Hot dip Galvanized Q235 Steel Ringlock Scaffolding for Architecture

Our Product Introduction

for more products please visit us on bythaiscaffold.com

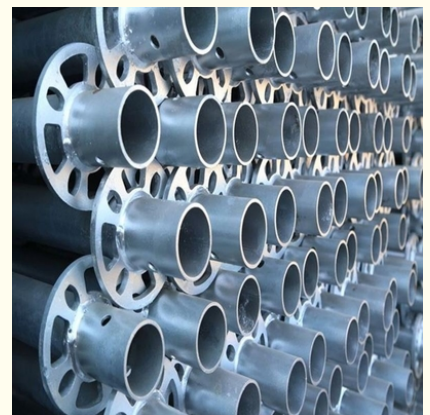

Basic Information

- Place of Origin: Tianjin China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Product Name: Ringlock System
- Shipping Origin: China
- Material: Q235 Steel
- Application Scenarios: Architecture
- Warranty: 2 Years
- Surface Treatment: Hot-dip Galvanized
- Highlight: **Architecture Ringlock Scaffolding, Q235 Ringlock Scaffolding**

Product Description

Product Description:

The Ringlock System Scaffolding is a state-of-the-art, versatile, and user-friendly scaffolding solution, meticulously designed to meet the demanding needs of modern architecture. Crafted with precision from high-grade Q235 Steel, this robust system is engineered to provide stability, safety, and efficiency on construction sites and various architectural scenarios. Its superior build quality is matched by a generous 2-year warranty, ensuring that customers can trust in its reliability and durability over time.

At the heart of the Ringlock System Scaffolding lies the innovative ringlock rosette, a pivotal component that allows for rapid and secure connections. Thanks to this feature, the system offers unparalleled flexibility, enabling multidirectional erection that can adapt to complex geometries and structures commonly encountered in architectural projects. Whether it's for the construction of commercial buildings, residential complexes, or public infrastructures, the Ringlock System Scaffolding provides a comprehensive solution that architects and builders can rely on.

In terms of longevity and maintenance, the steel ringlock scaffolding boasts a surface treatment of Hot-dip Galvanized, which provides a tough, Corrosion-Resistant Ringlock finish. This treatment ensures that the scaffolding performs reliably in a variety of environmental conditions, resisting the harsh effects of weathering and wear. As a result, the system remains safe and stable for workers, while also retaining its functional and aesthetic qualities over time.

The shipping origin of this premium scaffolding system is China, a hub of manufacturing excellence. By sourcing the Ringlock System Scaffolding from China, customers benefit from cutting-edge production standards, cost-effectiveness, and access to a wealth of scaffolding expertise. The strategic location also ensures that the scaffolding can be transported efficiently to various parts of the world, reducing lead times and facilitating smoother project timelines.

Installation of the Ringlock System Scaffolding is straightforward, with intuitive locking mechanisms that reduce the requirement for specialized tools or extensive training. The simplicity of assembly and disassembly translates into significant time and labor savings, enabling construction projects to progress swiftly and without unnecessary delays.

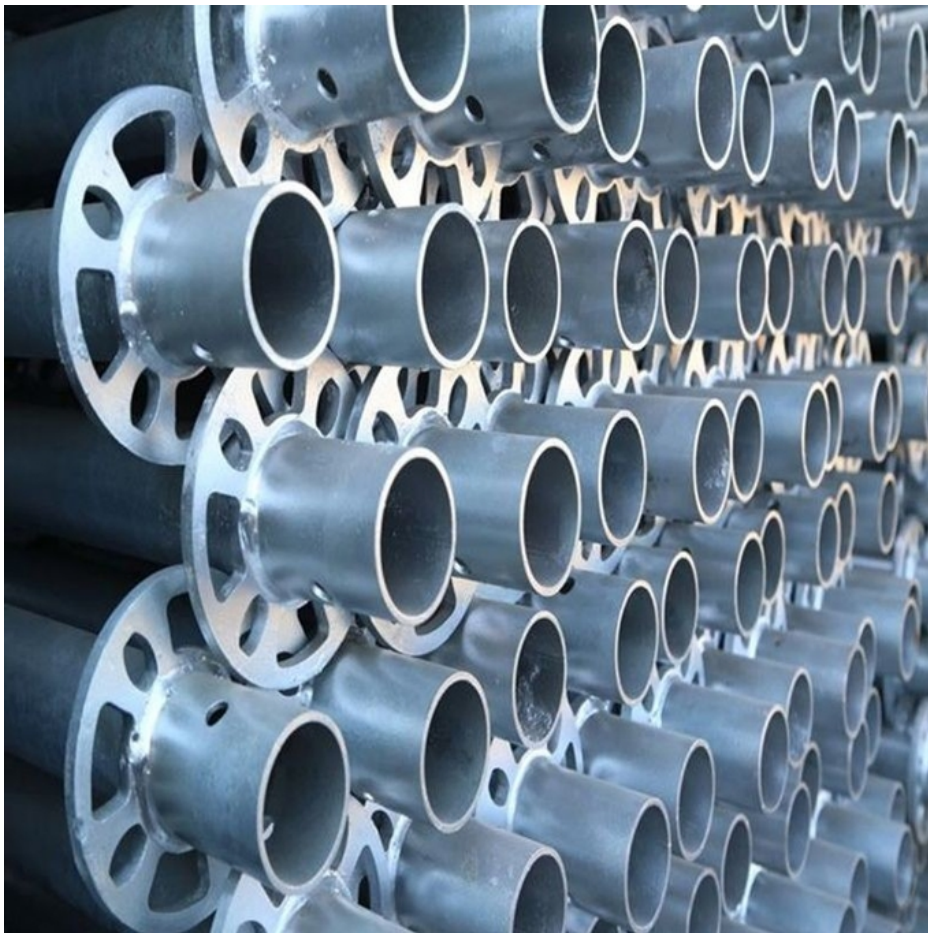

Safety is paramount in any construction scenario, and the Ringlock System Scaffolding excels in providing a secure work platform for users. Its design complies with stringent international safety standards, and each component undergoes rigorous quality control to ensure that it meets the highest levels of structural integrity. The Q235 Steel material, known for its excellent strength-to-weight ratio, contributes to the robustness of the entire system, giving peace of mind to both the workers onsite and project stakeholders.

Customer support is an integral part of the value proposition of the Ringlock System Scaffolding. With the backing of a 2-year warranty, clients can rest assured that any issues related to manufacturing defects or material weaknesses will be promptly addressed. This warranty, coupled with professional customer service, underscores the commitment to quality and customer satisfaction that is synonymous with the Ringlock System Scaffolding brand.

Technical Parameters:

Attribute	Details
Product Name	Ringlock System
Shipping Origin	China
Warranty	2 Years
Application Scenarios	Architecture
Place of Origin	Tianjin, China
Material	Q235 Steel
Surface Treatment	Hot-dip Galvanized
Compliant with Scaffolding Standards	Yes
Soporte Diagonal Ringlock	Included
Easy Installation Scaffold System	Yes

Packing and Shipping:

The Ringlock System Scaffolding components are meticulously packaged to ensure secure and efficient transportation. Each piece is individually wrapped with protective materials to guard against scratches and impact during transit. The components are then carefully placed onto wooden pallets, which are designed to accommodate the weight and size of the scaffolding system. The pallets are then wrapped with stretch film and secured with strapping to maintain the integrity of the package and prevent any movement of the parts. Additionally, corner protectors are applied to safeguard the edges and corners of the pallets.

For shipping, the palletized Ringlock System Scaffolding is loaded into containers or trucks using forklifts by trained personnel. The containers are then sealed and labeled with the necessary shipping information, including a detailed packing list that corresponds to the customer's order. This ensures that the product arrives at its destination in the same condition it left the factory, ready for immediate and safe use on construction sites.
