Durable Galvanized Steel Hook Scaffolding Planks For Construction

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 15.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping, L/C, T/T

Product Specification

- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Place Of Shipment: China
- Length: Customized
- Packaging: Container
- Material: Steel
- Usage: Scaffolding
- Highlight: **Galvanized Steel Hook Scaffolding Planks**, **Durable Galvanized Scaffolding Planks**, **Construction Scaffolding plank**

Product Description

Product Description:

The Scaffolding Plank is an essential component for construction and renovation projects, providing a robust and reliable platform for workers to operate safely at various heights. This plank has been meticulously designed to meet the rigorous demands of the scaffolding industry and is crafted from high-grade steel, ensuring durability and a long service life. Our Scaffolding Plank is available in a variety of lengths that can be customized to suit the specific needs of your project, making it an incredibly versatile option for a wide range of applications.

Constructed from steel, the Scaffolding Plank offers superior strength and stability underfoot. The steel material ensures that the plank can withstand the heavy loads and stresses commonly encountered on construction sites. Moreover, the resilience of steel guarantees that the plank will resist warping, cracking, or succumbing to the elements, which is critical for maintaining a safe work environment over time.

One of the standout features of our Scaffolding Plank is the range of surface treatments available, catering to different environmental conditions and customer preferences. The pre-galvanized option provides a layer of protection against rust and corrosion, making it suitable for indoor and outdoor use. For even greater durability, the hot-dip galvanized finish offers a thick, uniform coating that can endure harsh weather and resist corrosion for extended periods. Alternatively, the spray plastic surface treatment adds an extra layer of protection while also enhancing the plank's resistance to wear and tear.

Our steel plank with hook design is tailored for seamless integration with various scaffolding systems. The hooks are engineered to securely latch onto scaffolding structures, ensuring that the planks remain firmly in place even during intense construction activity. This feature provides peace of mind to workers, knowing that their working platform is safe and secure.

Additionally, the steel plank ringlock system is another compatible scaffolding configuration that our planks can accommodate. The ringlock system is renowned for its ease of assembly and robust locking mechanism, and our planks are designed to fit perfectly with this system, offering a sturdy and safe platform for users.

Pierced steel planking is another attribute of our Scaffolding Planks. The perforations provide multiple benefits, including reduced weight for easier handling and installation, as well as improved grip, which is crucial for preventing slips and falls. Moreover, the pierced design allows for better drainage, helping to keep the work surface dry and safe even in wet conditions.

We take pride in the quality of our Scaffolding Plank, and its place of shipment, China, ensures that you are accessing a product that benefits from efficient manufacturing processes, rigorous quality control, and cost-effectiveness. China's well-established logistics infrastructure also allows for timely and reliable delivery to your job site, no matter where it is located.

In summary, our Scaffolding Plank is an indispensable tool for any construction or renovation project. Its steel construction, customizable length, various surface treatment options, compatibility with hook and ringlock systems, pierced design for safety and handling, and reliable shipment from China make it an excellent choice for contractors and construction companies seeking a high-quality, safe, and cost-effective scaffolding solution.

Technical Parameters:

Attribute	Details
Material	Steel
Packaging	Container
Length	Customized
Usage	Scaffolding
Surface	Pre-galvanized/hot Dip Galvanized/Spray Plastic
Place of Shipment	China
